

ASME CODE SHOP FABRICATION OF WELL SITE PIPING

Many of the industry's leading E&P companies have already switched to shop fabrication to lower costs, increase quality, and provide uniformity

Although well site piping has been traditionally fabricated on-site, you can save money, reduce your schedules, and provide a more quality product by having Blackeagle build it ahead of time in our ASME code shop.

ADVANTAGES INCLUDE:

Financial

- No rig pay or per diems, reducing costs over field fabrication by up to 40%
- Increase your revenue – compressed schedules mean quicker time to product sale

Quality

- Shop fabrication to your specifications means all well site piping meets your standards
- Being an ASME code shop, Blackeagle utilizes many qualified welding procedures that provide the highest of industry standards

Scheduling

- Build ahead of time – no waiting on field crews or weather
- Take days off your schedule with pre-built well site piping installed with just a few field welds

INTEGRATED SERVICES

Blackeagle engineers, fabricates, tests and paints all of our products from one location – you get exactly what you need with only one phone call.

QUALITY

In the oil & gas industry for over 30 years, Blackeagle is an ASME code shop with U and R stamps and 45 qualified welding procedures, assuring the finest quality of weld processes available.

SCALE

Working from a facility with over 85,000 sq. ft in production area, 11 overhead cranes, and in-house wet spray booth facility, Blackeagle has the capacity to meet your schedule and volume demands.

SAVE MONEY. REDUCE YOUR SCHEDULE. INCREASE YOUR QUALITY. WHY WAIT?
